Apocalypsis Therapy
You don’t have to resort to chemical peeling!

Your appointment with plastic surgery is postponed...

You have heard that chemical peeling is a dermatological method for gradually removing one or more skin layers using chemical substances.

It is time to hear about the revelation of nature (Phytopeeling) and Cosmetology, that jointly promise you “chemical peeling”, cellular rejuvenation.

With the power of your own cells...

ACTIVE INGREDIENTS: GLYCOLIC ACID, LACTIC ACID, SPONGILLA, FRAGILIS, EPHYDATIA, KELIFLUO, DERMONECTIN, DRIELINE, PENTAVITIN, PANTHENOL.

ACTION: Apocalypsis Therapy is a medium «chemical peeling» therapy and a rapid skin cell rejuvenation therapy at the same time. It is based on combined exfoliation-rejuvenation effects of Spongilla, Fragilis and Ephydatia herbs with Alpha Hydroxy Acids (AHA) in concentrations up to 40% and a pH of 2.5. This combination multiplies the efficacy of our intervention to wrinkles, dyschromias, scars and spots.

Potent soothing action of KELIFLUO, PANTHENOL and MS derivative of salicylic acid reduce common undesired irritations of chemical peeling.

CUTTING-EDGE TECHNOLOGY

About Phytopeeling

It was originally used by doctors and contains wholly natural ingredients from Spongilla, Fragilis and Ephydatia herbs, found in lakes of Russia and Canada.

- It stimulates cellular rejuvenation and removes degenerated cells, preventing the occurrence of superficial lesions and dyschromias.
- It activates vital skin functions and invigorates disorganized tissues, restoring skin consistency, elasticity and brightness.
- It restores irregular keratinization of the skin; it regulates sebum secretion.

By using Phytopeeling we achieve intense skin hyperemia. Along with increased blood circulation, cellular metabolism is enhanced, resulting in faster growth at the level where collagen, elastin, fibronectin and hyaluronic acid production is being done.

RECOMMENDED: The «exfoliation» protocol intends to treat dyschromias, lentigines, scars, acne marks, and wrinkles and to provide skin rejuvenation, regeneration and the “acne” protocol intends to treat acne and to regulate oiliness.
THERAPY PRODUCTS:
Apocalypsis Therapy is an exclusive therapy for beauty salons.
It was created in the Juliette Armand laboratories and it includes the following products:

STAGE 1: Cleansing
We cleanse the face and the neck thoroughly with cleansing milk and lotion. At this stage we proceed to deep cleansing, in case the skin needs it.

STAGE 2: Preparation
We cover the area around the eyes and lips with eye mask and nostrils, nevi and maculae with an oily cream (elements NOURISHING NIGHT CREAM).

STAGE 3: Phytopeeling
We mix 5g of PHYTOPEELING PURE powder with PHYTO-AHA LOTION, until they become a paste.
We apply the paste throughout the face, wearing gloves, and perform a gentle massage with circular motions. If needed, we moisten our fingers again with lotion. When we see the skin turning red, we stop and apply steam for 10 minutes. Then, we gently remove with water. The duration of the application depends on skin type, the personal judgment of the beautician and the extent of the exfoliation we intend to achieve.

STAGE 4: AHA action (optional)
We apply 20% AHA FRUIT GEL topically or throughout the face with gentle movements, without massaging or rubbing, in order to avoid further irritation of the skin. We leave it on and gently remove with NEUTRAL LOTION, as soon as the skin turns white. Acids should not be applied for more than 1 minute.

The level of acid concentration, in %, depends on the area of application, the lesion we intend to treat, the desired degree of exfoliation and, of course, on the skin type. This stage may be omitted if the specialist judges that a milder effect is desired.

STAGE 5: Protection
We apply elements CLARIFYING MASK for 20 minutes and carefully remove with water. Finally, we protect the skin with SUNFILM GEL SPF30, which soothes irritation and offers sun protection.

TREATMENT AT HOME: After therapy non stop action
For the first 2 days the skin becomes red and we feel a prickling sensation, which slowly diminishes. For the next 3 days the skin will exfoliate. The only product that has to be applied for this 5-day period is SUNFILM GEL SPF30.

Until skin exfoliation is completed the following are prohibited:
- Water
- Swimming (pool – sea)
- Ski Fitness
- Anything that promotes perspiration
- Sun exposure (mountain or sea)
- Contact with detergents and dust
- Touching your face with your hands, rubbing of your face or pulling away peeling skin
- The use of any other product, except for SUNFILM GEL SPF30
- Washing your face with water.

On the 5th day, when usually exfoliation has been completed, we finalize the treatment.

CONTRAINDICATIONS: Thin and sensitive skins with telangiectasias, hypertrichosis, skin conditions, extremely infectious conditions, allergies, wounds, melanomas, and dark-colored people with dyschromias, pregnancy, herpes labialis and herpes zoster.
Application during the summer months is prohibited.
TREATMENT FINALIZATION PROTOCOL (5 days later)

STEP 1: Cleansing
We thoroughly cleanse the face and neck gently and carefully with cleansing milk, by mild massaging under steam. Then, we remove exfoliation residues by soft peeling elements CACAO PEELING CREAM.

STEP 2: Preparation
We apply elements CLARIFYING MASK for 20 minutes and carefully remove with water.

STEP 3: Regeneration
We apply 2ml of elements DNA REPAIR SERUM, with gentle massage throughout the face and neck. Then we apply elements EXFO LINE MASK, allow it to dry and remove it with water.

STEP 4: Protection
We apply 1ml of DERMA HEAL GEL and SUNFILM GEL SPF30 to the face and neck, massaging it gently.

TREATMENT AT HOME: After therapy non stop action
DERMA HEAL SERUM & DERMA HEAL GEL (oily) or DERMA HEAL SERUM & DERMA HEAL CREAM (normal – dry).

TREATMENT REPETITION: Depending on the clinical appearance and skin type but not earlier than 28 days.

For guaranteed results...
Treatment results are established and superior to any other method in terms of combined action (exfoliation and rejuvenation) and safety. Latest studies performed by American scientists prove that skin cancer occurrence is reduced by 80% in people who regularly use medium depth peeling.
